## SECTION B

### API End Point

| HTTP Method | Route              | Description                                                                                        | Role Required   | Request Body                  | Expected Response                                                                                         |
|-------------|--------------------|----------------------------------------------------------------------------------------------------|-----------------|-------------------------------|-----------------------------------------------------------------------------------------------------------|
| POST        | /api/auth/register | Creates a new RaceDay user account. The user provides their personal details and login information | None (Public)   | {name, email, password, Role} | 201 Created – User account created successfully. 400 Bad Request – Invalid information                    |
| POST        | /api/auth/login    | Authenticates a registered user and allows them to access protected RaceDay features               | None (Public)   | {email, password}             | 200 OK – Login successful and authentication token returned. 401 Unauthorized – Invalid email or password |
| GET         | /api/profile       | Returns the profile information of the current logged in user                                      | Any (logged in) | None                          | 200 OK – User profile returned. 401 Unauthorized – User is not log in.                                    |

|      |                   |                                                                        |                 |                                                                          |                                                                                       |
|------|-------------------|------------------------------------------------------------------------|-----------------|--------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
| PUT  | /api/profile      | Updates the profile information of the current logged in user          | Any (logged in) | {name, email, phone}                                                     | 200 OK – Profile updated successfully. 400 Bad Request – Invalid information.         |
| GET  | /api/events       | Returns a list of upcoming RaceDay events that participants can browse | None (Public)   | None                                                                     | 200 OK- List of events returned.                                                      |
| GET  | /api/events/ {id} | Returns detailed information about a specific event                    | None (Public)   | None                                                                     | 200 OK – Event details returned. 404 Not Found – Event does not exist.                |
| POST | /api/events       | Creates a new running walking or cycling event                         | Event Organizer | {eventName, eventDate, location, categoryID, routeID, entryFee}          | 201 Created- Event created successfully. 400 Bad Request – Invalid event information. |
| PUT  | /api/events/ {id} | Updates the details of an existing event                               | Event Organizer | { eventName, eventDate, location, categoryID, routeID, entryFee, status} | 200 OK – Event updated successfully. 404 Not found                                    |

|        |                      |                                                                    |                 |                              |                                                                                             |
|--------|----------------------|--------------------------------------------------------------------|-----------------|------------------------------|---------------------------------------------------------------------------------------------|
|        |                      |                                                                    |                 |                              | – Event does not exist.                                                                     |
| DELETE | /api/events/{id}     | Removes an event from the RaceDay system.                          | Event organiser | None                         | 204 No Content – Event deleted successfully. 404 Not found – Event does not exist.          |
| GET    | /api/categories      | Returns all event categories, such as running, walking and cycling | None (Public)   | None                         | 200 OK – List of categories returned.                                                       |
| POST   | /api/categories      | Creates a new event category.                                      | Event Organiser | { categoryName, description} | 201 Created – Category created successfully. 400 Bad Request – Invalid category information |
| PUT    | /api/categories/{id} | Updates and existing event category                                | Event Organiser | { categoryName, description} | 200 OK – Category updated successfully. 404 Not Found – Category does not exist.            |

|        |                      |                                                                  |                 |                                                                |                                                                                        |
|--------|----------------------|------------------------------------------------------------------|-----------------|----------------------------------------------------------------|----------------------------------------------------------------------------------------|
| DELETE | /api/categories/{id} | Deletes an existing event category                               | Event Organizer | None                                                           | 204 No Content – Category deleted successfully. 404 No Found – Category does not exist |
| GET    | /api/routes          | Returns available race routes and their distances and locations. | None (Public)   | None                                                           | 200 OK – List of routes returned.                                                      |
| POST   | /api/routes          | Creates a new route that can be used for an event.               | Event Organizer | {routeName, distanceKm, startPoint, finishPoint, description}  | 201 Created – Route created successfully. 400 Bad Request – Invalid route information. |
| PUT    | /api/routes/{id}     | Updates an existing race route                                   | Event Organizer | { routeName, distanceKm, startPoint,finishPoint , description} | 200 OK – Route updated successfully. 404 Not Found – Route does not exist.             |
| DELETE | /api/routes/{id}     | Removes an existing race route.                                  | Event Organizer | None                                                           | 204 No Content – Route deleted successfully                                            |

|        |                             |                                                                             |                 |            |                                                                                                                                   |
|--------|-----------------------------|-----------------------------------------------------------------------------|-----------------|------------|-----------------------------------------------------------------------------------------------------------------------------------|
